MINES AND MINING STOCKS.

FINANCIAL AND COMMERCIAL.

IN NEW GROUND.

Favorable Market Conditions.

Since the cessation of production there have been some remarkable changes in the market value of the various metals. Only eighteen months ago lead was 1 cent a pound less than it is today; copper was nearly 5 cents a pound less; silver was 10 cents an ounce less, and zinc was being heavily penalized by the smelters. Now there is just as good a market for zinc as there is for lead, and the company will be able to market at a handsome profit, not only the more than 20,000 tons of middlings that it holds in reserve, but every pound of such product it is able to turn out in the future will also find a ready market. These are a few of the favorable auspices under which the company is now beginning operations.

Touching developments in the mine, an inspection which was made a few days ago with Superintendent John accories as guide, much might be written. In the early stages of the work occasional mention was made or ore bodies that had been cut, but these reports were finally withheld entirely, as the management was opposed to their publication. Not because there was anything to hide was this close-mouthed policy pursued, but because it was realized that the simple cutting of an ore shoot was often taken to mean more tuan conditions justified. Manager Daly contended that it was wrong to designate such disclosures as "strikes" and finally closed the doors altogether against information of any kind going to the public.

Results of Development.

Practically all of the new work has been done on the 1,300, 1,400 and 1,500-foot levels, beginning something like 2,000 feet westerly from the line which divides the Daly-West and Daly-Judge mines. From the new drift alone more than 15,600 tons of ore has been taken out and sent down to the mill. The balance has come from transports raises without suffernments. to the mill. The balance has come from cross-cuts, raises, whizes, stopes, sub-levels, etc., that have been started. At numerous points in these new workings preparation has been made for active mining and it would be no exaggeration to say that Superintendent McSorley could, were the congestion relieved at a number of these places, begin mining tomorrow and supply almost any tomage that might be demanded of him. This fact is mentioned because the public has but little conception of the manner in which this new territory has been handled.

Over for One Thousand Feet.

Ore for One Thousand Feet.

NOW A BIG MINE

| level, and while there is yet something like 190 feet to run in order to get directly under where the bodies make on the 1.490, the face has now been all in ore for several days the grade of which is exceptionally good and running high in gold. The management has no doubt that conditions as they exist on the 1.490 level will at least be duplicated on the 1.500, while the chances are in favor of its proving up even better.

On and above the 1.400-foot level and whele within the zine zone is located what is known as the big stope. This has been mined out in a space about 190 feet wide, 190 feet long and possibly fifty feet high. Here the ore is a heavy sulphide and of a good milling grade. It would be possible to drill holes in this ore body and break it down 1.600 tons at a blast. The limits of this shoot have not yet been determined in any direction, though it has been proven to reach for a distance of 130 feet above the 1.200 level and to cut through it on the 1,300 level required 180. Back Ledge Development.

| Nut and Camp mining claims in North Tiffite mining district. D. C. Harrington is president. James P. Murphy, vice president, J

Back Ledge Development.

GREAT ORE BODIES ARE OPENED IN NEW GROUND.

State of the Light level in the Case in the Section of the Polish production. The miling plant is now being placed in commission and, by the first of the year, or thereabouts, is expected to be run, ning well to toward its capacity. The tomage treated, however, will depend the separation of the metals from the gangue is accomplished. The miling which experient on the metals from the gangue is accomplished the cars run from the mouth of the cars from the cars run from the mouth of the cars from the cars run from the mouth of the cars from the cars run from the mouth of the cars from the cars run from the mouth of the cars from the cars fr

In these old workings, all of which have been kept in shape for re-entering at any time, mining was being carried on at thirty-three different places, with

present.

As Superintendent John McSorley, who has spent the best years of his life larsting open many miles of ground in this particular portion of the Park City district, says: "The Daly-Judge mine, with its immense to long, with its immense to long, with its immense to long, will be sproducing and making money fifty years from new."

his ore.

C. K. Rowland has returned from a trip to the east, where he has been on ousiness connected with his oil interestin this state. He declares that there is more money in the east looking for investment in the west than there is demand for it. Any kind of proposition, Mr. Rowland says, that is mentorious, need not go begging. Utah he reports to be held in especial favor everywhere.

The roads into Alta are now in prime condition and the various operating companies are taking every advantage of them to get in supplies to tide over the stermy season that is sure to come. Manager William Hatfield of Albion now has a string of teams hathing ore from the mire, and taking up timbers, etc., that will be badly needed during the winter days when it will be impossible to reach the mine.

Butter and Eggs.

Eggs-Steady at mark; cases included. bronchitis, etc. Positively prevents tras. 26. Cheese Steady to firm; 114@13.

GRAIN AND PROVISIONS.

Chicago. Dec. 18.—The wheat market was weak from the opening to the close. Bull leaders who had during the last few days given the market sufficient support to prevent any material decline did not today resist the efforts of the bears. On the contrary, one of the principal longs was credited with sales of wheat to a considerable amount. This was the chief source of weakness, although the callegrams from Argentine had caused bearish, sentiment at the

The corn market was remarkably firm.

The market closed steady. May closed to lower at 44%.

The outs market was easier. May closed at 324 932%, a loss of 14.

On account of active realizing by local longs the provision market was a trifle easier. At the close May pork was off 5, lard was down a shade and ribs were a shade lower.
